

**RX Exploration Inc.
(the “Company”)**

MANAGEMENT’S DISCUSSION AND ANALYSIS

**Six Month Period Ending
December 31, 2007 and December 31, 2006**

1.1 Date

This MD&A refers to material information regarding the financial period of the Company ended December 31, 2007 and was prepared on February 28, 2008.

1.2 Overall Performance

Description of Business

The Company is engaged in mineral exploration in northern Ontario and Montana. At this time the Company does not own or operate any revenue producing mineral properties and, accordingly, does not have any cash flow from operations. The Company raises funds for exploration and general overhead and other expenses through the issuance of shares from treasury.

The Company intends to continue raising funds for future exploration and on-going overhead and other working capital expenses through the continued issuance of shares from treasury. In general, based on the current circumstances, management of the Company believes that there will be sufficient interest from participants in the capital markets and other mineral exploration and mining companies willing to fund exploration programs to continue to meet the Company’s ongoing overhead and exploration expenses.

Montana Mining Claims

The Company entered into an agreement with private arm’s length owners to option from them 100% of their interest in patented mining claims (the “Hard Rock Claims”) situated in Lewis and Clark County in the State of Montana consisting of 23 claims comprising approximately 200 – 300 acres (3 of the claims consist of less than 100% interest). The claims include the inactive past producing Drumlummon Gold and Silver Mine.

In order to maintain the Drumlummon option in good standing, the Company has paid the sum of US\$145,000 to date to the Optionors. The Company must pay a further US\$1,090,000 payable US\$130,000 into escrow as noted hereinafter and the balance in four equal annual payments of US\$240,000. The Company has determined that, in order to obtain clear and insurable title to the Drumlummon Claims, it is required to file a quiet title action as to certain entities and parties, as specified in a title commitment issued to the Optionors and the Company also needs to examine documents to assure access to the Drumlummon Claims. Pursuant to an agreement with the Optionors, the US\$130,000 payment due to the Optionors was placed in escrow with First Montana Title Company and shall be released to the Optionors upon securing a final, non-appealable judicial order quieting title to the

Drumlummon Claims and reasonable assurance, from county documents of record of right of access to and from the Drumlummon Claims. The Company has retained Montana legal counsel to handle these title matters and the appropriate legal application is ongoing.

As additional consideration, the Company has paid to the Optionors 200,000 common shares in the capital of the Company with a one year hold period expiring May 18, 2008. A two percent (2%) Net Smelter Return (“NSR”) royalty on the Drumlummon Claims has been reserved to the Optionors.

The Company has staked a further 68 claims adjacent to the Drumlummon Claims.

The Company commissioned a technical report in accordance with the standards set out in National Instrument 43-101. The report was prepared by Timothy J. Beesley, P.Eng., of T.J. Beesley Geological Services Inc., a “qualified person” within the meaning of National Instrument 43-101. The report ties together mining and geological data from the last 134 years to recent drilling carried out for the Company and draws conclusions and makes recommendations to allow the Company to proceed with exploration and development of the Drumlummon Property. The technical report was published and filed on SEDAR website at www.sedar.com and CNQ website at www.cnq.ca, and a news release dated September 5, 2007 was disseminated which contains excerpts of the highlights of the report.

The Montana Power Company has completed the process of installing permanent power to the Drumlummon Mine. Blue Range Engineering Co. has been awarded a contract to rehabilitate the Maskelyne Tunnel from the portal to the No. 1 Shaft and from the No. 1 Shaft to the “9-hour Workings”, a total distance of approximately 2,800 feet. Underground equipment has been moved to the site, and rehabilitation work is ongoing. Periodic underground diamond drill stations are being installed. Office and storage facilities have been installed on the site to permit ongoing work throughout the winter.

During January 2008, management was primarily involved in continuing underground work in the Drumlummon Mine and activities related to raising short and long term funding for the Company as well as obtaining the necessary permits from the U.S. Mine Safety and Health Authority (MSHA) to continue with its underground program at the Drumlummon Mine.

Veekay Lake Mining Claims

On October 25, 2005, the Company entered into an option agreement dated October 21, 2005 with Wabassi River Resources Inc. (“Wabassi”), an arm’s length company, to acquire an undivided 50% interest in eight (8) unpatented mining claims (totalling 108 claim units) in the Thunder Bay Mining Division, in the Province of Ontario (the “Claims”).

In order to maintain the option in good standing, the Company paid Wabassi the sum of \$5,500 and is required to incur first year mining expenditures of not less than \$150,000 (of which it has expended \$99,500 to date), incur further mining expenditures of not less than \$200,000. Thereafter, the Company may elect to earn its 50% interest by paying Wabassi the sum of \$150,000 and incurring further mining expenditures of not less than \$1,150,000. In the alternative, the Company may elect to convert its interest to 10% of the shares of a new company to be created to explore and develop the Claims.

The Claims are subject to a royalty interest equal to a two percent (2%) net smelter return (“NSR”) royalty. The Company may, at any time, repurchase a one percent (1%) NSR for the purchase price of \$1,500,000.

The Company is prepared to commence exploration on the Veekay Lake Project. In order to accomplish its business objectives, which are to acquire, explore and develop prospective natural resource properties, the Company commissioned a program of line-cutting in preparation for an IP survey on the Veekay Lake Project. The Company has not been able to meet its requirements under this arrangement as access to the land claims and Zulapa interest have not yet been granted by the First Nations band however, the Company will continue to proceed with this exploration once permission has been granted. In the meantime, assessment work requirements have been held in abeyance.

The Company commissioned a technical report in accordance with the standards set out in National Instrument 43-101. The report is published and filed on the SEDAR website at www.sedar.com.

Tudhope-Bryce Townships Mining Claims (Ontario)

The Company has entered into an agreement with Gold Bay Exploration Inc. (“Gold Bay”) to option from them an undivided 50% interest. Gold Bay holds an option on the properties which consist of 44 mineral claims containing 110 claim units or 1,760 hectares. Magnetic and Spectral/IP Resistivity surveys were carried out over a grid consisting of 255 line km in the Honeymoon Lake and Heather Lake areas of the property in 2006, to follow up results of previous surface stripping and sampling for gold. Along the Honeymoon Lake Shear Zone results from the Spectral IP/Resistivity survey outlined two weak to moderate IP chargeability anomalies on Line 800E and 600E. The magnetic survey indicated a younger, non-foliated intrusive which intersected the Honeymoon Lake Shear Zone. Two diamond drill holes, on Lines 800E and 600E, tested the IP chargeability anomalies, and a third tested the younger intrusive, for a total of 567 metres.

Best results from DDH BRY- 1 on 800E were 8.3 g/T gold and 0.235% copper/0.08m, in a grey quartz vein, followed immediately by a light green sericite schist with 30% quartz, 5% sulphides and <1% chrome mica carrying 0.8g/T gold and 0.075% copper/0.45 m. Best results from DDH BRY-2 on 600E were 4.4 g/T gold and 0.365 % copper/0.25 m, and 20 m downhole 4.6 g/T gold and 0.093% copper/0.34 m. Both of these intersections occurred in dark altered tuff near the contact with agglomerate, and consisted of quartz-sericite schist containing 3-5% pyrite and <1% chalcopyrite. No exploration had been carried out west of Line 700E on the Honeymoon Lake Shear Zone, and these results indicate gold mineralization on the structure is open to the west. The younger magnetically indicated intrusive was not intersected.

The Company is in default of the option payment requirements under its option agreements. Management of the Company is evaluating with its technical and financial advisors the results of the drilling programs on the Tudhope and Bryce Township properties which were announced in its news release dated April 4, 2007 but has yet to determine its future plans. As a result management has expensed the deferred costs.

1.3 Selected Financial Information

The net loss for the second quarter ended December 31, 2007 was \$55,363 (2006 - \$25,792) or a \$0.002 (2006 - \$0.002) net loss per share, basic and diluted. This consisted of office and general expenses (\$41,303) and professional fees (\$14,060).

Total assets at the end of the quarter ended December 31, 2007 were \$3,246,049 and consisted of cash in the amount of \$272,242 and mining claims and deferred exploration expenditures in the amount of \$674,672.

The Company has no long term financial liabilities and no cash dividends per share.

No salaries or management fees were paid to any directors or officers for the quarter ended December 31, 2007.

In December 2007, the following securities were issued:

(a) 3,333,333 common shares were issued at a price of \$0.15 per common share for total gross proceeds of \$500,000;

(b) 3,722,000 units (“Flow-Through Units”) at a price of \$0.50 per Flow-Through Unit, for total gross proceeds of \$1,861,000. Each Flow-Through Unit consisted of one common share and one-half common share purchase warrant exercisable until December 20, 2009 at \$0.75 per common share;

(c) 333,333 Broker Warrants were issued, exercisable until December 20, 2009 at a price of \$0.15 per common share, and 352,000 Broker Warrants were issued, exercisable until December 20, 2009 at a price of \$0.50 per common share; and

(d) 1,097,500 common shares of the Company were issued at a price of \$0.15 per share pursuant to the exercise of previously existing common share purchase warrants for total proceeds of \$164,625.

(e) A cash commission of 9% of the gross proceeds was paid in addition to the Broker Warrants noted above.

As at December 31, 2007, there were 32,586,508 shares issued and outstanding with a value of \$4,758,749.

1.4 Results of Operations

The Company has no sales and has never earned revenues with the exception of non-material interest revenue. Raising capital through sales of its common shares funds the Company’s mining exploration operations.

Twelve months ended June 30, 2007 Compared to Twelve Months Ended June 30, 2006

Total expenses for the twelve months ended June 30, 2007 amounted to \$278,729 compared to \$149,496 for the twelve months ended June 30, 2006.

The Company incurred a loss of \$224,579 for the 12 months ended June 30, 2007 as opposed to a loss of \$149,496 for the 12 months ended June 30, 2006. The expenses consist of office and general expenses of \$49,792, professional fees of \$25,337 consistent with its refinancing and restructuring efforts to enable the Company to become an active publicly traded mineral exploration company, stock-based compensation of \$3,000 and write-down of deferred exploration expenditures (see Section 1.2 related to Veekay Lake Mining Claims).

During the twelve months ended June 30, 2007 the Company sustained a loss of \$0.015 per share compared to a loss of \$0.069 for the twelve months ended June 30, 2006.

1.5 Summary of Quarterly Results to December 31, 2007

Description	Dec 31/07 \$	Sep 30/07 \$	Jun 30/07 \$	Mar 31/07 \$	Dec 31/06 \$	Sep 30/06 \$	June 30/06 \$	Mar 31/06 \$
Sales/Revenue	Nil	Nil	Nil	Nil	Nil	Nil	Nil	Nil
Income/(Loss)	(35,189)	(20,174)	(228,287)	29,498	(20,104)	(5,686)	(123,114)	(11,491)
Net Income/(Loss) per Share - Basic and Diluted	(0.001)	(0.001)	(0.015)	(0.0017)	(0.002)	(0.0005)	(0.03)	(0.001)

1.6 Liquidity and Capital Resources

As at December 31, 2007 the Company had cash of \$272,242 and accounts payable and accrued liabilities in the amount of \$88,182.

As at December 31, 2007 the Company had no contractual commitments or lease agreements other than as disclosed herein. The Company has contracted with Blue Range Engineering to conduct rehabilitation at the Drumlummon Mine and has contracted for 20,000 feet of underground diamond drilling to commence about the first week on March 2008.

1.7 Capital Resources

The only resources available to the Company to raise exploration funds are the equity markets and joint venture arrangements with other mineral resource companies.

The Company is not in default of its obligations on its properties at this time.

1.8 Off-Balance Sheet Arrangements

The Company has no off-balance sheet arrangements.

1.9 Transactions with Related Parties

There were no related party transactions in the second quarter ending December 31, 2007.

1.10 Second Quarter ended December 31, 2007

In the second quarter ended December 31, 2007 there were no material events or items that affected the Company's financial condition, cash flows or results of operations, including extraordinary items, year-end adjustments other than disclosed herein and there were no dispositions of business segments.

1.11 Proposed transactions

There are no proposed transactions other than described herein.

1.12 Critical Accounting Estimates

This item is not applicable.

1.13 Changes in Accounting Policies including Initial Adoption

There have been no changes in the Company's accounting policies.

1.14 Financial Instruments and Other Instruments

The Company does not make use of financial or other instruments.

1.15 Controls and Procedures

Management is responsible for the design of internal controls over financial reporting to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the financial statements in accordance with accounting principles generally accepted in Canada. Based on a review of its internal control procedures at the end of the period covered by this MD&A, management believes its internal controls and procedures, for the nature and size of the entity, are effective in providing reasonable assurance that financial information is recorded, processed, summarized and reported in a timely manner.

Management is also responsible for the design and effectiveness of disclosure controls and procedures to provide reasonable assurance that material information related to the Company, is made known to the Company's certifying officers. Management has evaluated the effectiveness of the Company's disclosure controls and procedures and have concluded that these controls and procedures are effective, for the nature and size of the entity, in providing reasonable assurance that material information relating to the Company is made known to them by others within the Company.

1.16 Change in Accounting Policy

Effective July 1, 2006, the Company adopted the new recommendations of the Canadian Institute of Chartered Accountants (CICA) under CICA Handbook Section 1530, Comprehensive Income, Section 3251, Equity, Section 3855, Financial Instruments – Recognition and Measurement, Section 3861 Financial Instruments – Disclosure and Presentation and Section 3865, Hedges. These new Handbook Sections, which apply to fiscal years beginning on or after October 1, 2006, provide requirements for the recognition and measurement of financial instruments and on the use of hedge accounting.

Section 1530 establishes standards for reporting and presenting comprehensive income which is defined as the change in equity from transactions and other events from non owner sources. Other comprehensive income refers to items recognized in comprehensive income but that are excluded from net income calculated in accordance with generally accepted accounting principles.

Under Section 3855, all financial instruments are classified into one of these five categories: held-for-trading, held-to-maturity investments, loans and receivables, available-for-sale financial assets or other financial liabilities. All financial instruments and derivatives are measured in the balance sheet either at fair value except for loans and receivables, held-to-maturity investments and other financial liabilities which are measured at amortized cost. Subsequent measurement and changes in fair value will depend on their initial classification, as follows: held-for-trading financial assets are measured at fair value and changes in fair value are recognized in net income. Available-for-sale financial instruments are measured at fair value with changes in fair value recorded in other comprehensive income until the instrument is derecognized or impaired. All derivative instruments, including embedded derivatives, are recorded in the balance sheet at fair value unless they qualify for the normal sale normal purchase exemption. All changes in their fair value are recorded in income unless cash flow hedge accounting is used, in which case changes in fair value are recorded in other comprehensive income.

As a result of the adoption of these new standards, the Company has classified its cash and cash equivalents as held-for-trading. Accounts payable and accrued liabilities are classified as other liabilities, all of which are measured at amortized cost.

The adoption of these new standards had no impact on the Company's financial position as at June 30, 2007.

1.17 Other MD&A Requirements

In January 2008, 1,650,000 options were granted pursuant to the Company's incentive stock option plan exercisable at a price of \$0.32 per share until January 29, 2010, the options were issued to certain officers, directors and consultants as set out in the Company's press release dated February 1, 2008 which was filed on the SEDAR and CNQ websites.

Share Data: There are 32,586,508 shares issued and outstanding as at February 28, 2008. Additional information relating to the Company is available on SEDAR @ www.sedar.com.
